Design Skills

GIMP ❖ Photoshop ❖ Inkscape

WORK EXPERIENCE

Front-end Web Developer   10/2015 – Present

[WIP] Colorfy: 2016 Color Coded Hackathon Project (Github), Front and Back end Developer
A digital storytelling platform designed to cover stories of success and inspiration of people of color, by people of color, authentically and with integrity.
- Building the a responsive website based on a design the team created together.
- Implementing Bootstrap and Flexbox for the grid system.
- Final product will be a WP theme.

[Client Site] Shot 2 Frame (Screenshots), Front and Back end Developer
Completely dynamic photographer portfolio
- Designed and built the custom WP theme using Bootstrap.
- Implemented a combination of Flexbox and JavaScript/jQuery to build a horizontal-scrolling gallery, with the lightbox effect.
- Built two custom gallery functions (one for the home page and one for the portfolio pages), overriding the original WP gallery function, and making new default galleries.

Personal Website (Website), Front and Back end Developer
- Designed and built using the JavaScript library ScrollMagic, which makes each section slide, pin, and move from left to right (and vice versa).

Editor-in-Chief & Operations Manager   8/2013 – 2/2016
Giga Geek Online Magazine
- Boosted website traffic by 30% by re-designing and regularly updating the existing WordPress theme.
- Spearheaded a change in goals for Giga, which led to a more focused direction and a valuable niche market.
- Utilized a strong command of English grammar, spelling, and punctuation to communicate, edit, and contribute quality content.
- Collaborated with and advised a team of remote volunteer writers, improving our content quality and organizational growth.
